B. Questions and Answers

- Q1.** If you have a relevant project that may be just below the requested project value or just outside of the last 6 years timeframe. If you use that as a relevant submission are you disqualified on that submission right away or will Parks Canada still consider the overall relevance in a contractor's qualifications.
- A1.** The values (years timeframe and cost) for the mandatory requirements must be met to qualify in Stage 1.
- Q2.** Will Parks Canada be looking to verify the septic installation of the Castle Campground system be completed by Certified Septic Installers in the Province of Alberta.
- A2.** This certification is not required, Bidders should be able to demonstrate recent relevant experience successfully installing septic fields, preferably within the public sector.
- Q3.** The horizontal directional drilling under a creek is a very specific field of work or task that would be completed by a subcontractor certified for such work. Is there another way to have the Prime Contractor prove his ability to coordinate such a task if he has not recently completed one in the 6 year time frame requirement? Would you consider a letter from qualified drilling subcontractors that were willing to work with the Prime for the Stage 1 requirements?
- A3.** This requirement (M3) is removed from Stage 1 and will be included as a horizontal drilling subcontractor experience in Stage 2.
