

Amendment No. 004

This amendment is being raised to provide a response to Request for Clarification.

Question 1.

Q1. Annex A, Item 4b. Due to glass reservoirs of this system, maximum pressure for liquid side is 20 PSI, is this acceptable?

R1. It is deemed acceptable if the OEM has backpressure systems with a capacity of 30 PSI.

Question 2.

Q2. Annex A, Item 5f. The requested system does not have liquid level monitoring for each reservoir. Will Canada consider removing this requirement from RFP?

R2. Glass reservoirs can be regarded as a method for monitoring liquid levels.

All other terms and conditions of the solicitation remain the same.
