INVITATION TO QUALIFY (ITQ)

IMPORTANT NOTICE

TWO PHASE SELECTION PROCESS

This is the first phase (Phase One) of a two-phase process: the first phase will evaluate the qualifications of all interested respondents; the second phase (Phase Two) will invite the qualified respondents to provide a financial bid on the project based on the specifications and drawings. The qualification list will expire upon award of a contract in Phase Two and the prequalification list will not be used in any other solicitation.

DEBRIEFING:

Should a respondent desire a debriefing, the respondent should contact the person identified as the Contracting Authority below within 15 working days of the notification of the results of the qualification process. The confidentiality of information relating to other submissions will be protected. The debriefing may be provided in writing, by telephone or in person.

LIST OF QUALIFIED RESPONDENTS:

A list of qualified respondents from Phase One will be released in Phase Two to all qualified respondents at time of solicitation. Contract award notice of the successful bidder of Phase Two will be posted on buyandsell.gc.ca

INSTRUCTIONS TO RESPONDENTS

1. TWO PHASE SELECTION PROCESS

Respondents responding to this selection process are requested to submit in two phases. Phase One qualification covers only the qualifications and experience of the respondent. Following the evaluation of the responses, respondents will be advised of their qualification result and the status of the Phase Two tender. Phase Two respondents will be provided an Invitation to Tender (ITT) for the financial evaluation in relation to the specifications and drawings.

Documents may be submitted in either official language of Canada.

2. ENQUIRIES:

All enquiries are to be submitted to the Contracting Authority:

Name: Shawn Davis

Email: shawn.davis@ec.gc.ca

Enquiries are to be made in writing and should be received no less than five (5) working days prior to the closing date to allow sufficient time to respond.

3. SUBMISSION OF QUALIFICATIONS

3.1. Electronic Response Submission

In order to be considered, responses must be received by the date and time indicated on the cover page to herein as the "Closing Date." Responses received after the Closing Date will be considered non-responsive and will not be considered for contract award. Responses submitted by email must be submitted ONLY to the following email address:

Email Address: soumissionsbids@ec.gc.ca

Attention: *Shawn Davis*

Solicitation Number: 5000075389

Respondents should ensure that their name, address, Closing Date of the solicitation and Solicitation Number are clearly indicated in the body of their email. Responses and supporting information may be submitted in either English or French.

The total size of the email, including all attachments, must be less than 15 megabytes (MB). It is each Respondent's responsibility to ensure that the total size of the email does not exceed this limit.

Responses sent by fax will not be accepted.

It is important to note that emails systems can experience systematic delays and, at times, large attachments may cause systems to hold or delay transmission of emails. It is solely the Respondent's responsibility to ensure that the Contracting Authority receives a response on time, in the mailbox that has been identified for response receipt purposes. Date stamps for this form of transmission are not acceptable.

4. RESPONDENT'S CONTACT INFORMATION

Legal Name: _____

Operating Name (if any): _____

Address: _____

Telephone: _____ Fax: _____ PBN: _____

E-mail address: _____

Name and title of person authorized to sign on behalf of
respondent: _____

Signature: _____

5. LANGUAGE PREFERENCE

If qualified to participate in the next step of the solicitation process, the respondent would prefer to receive correspondence and associated procurement documentation in the following language:

English French

6. JOINT VENTURES

1. A joint venture is an association of two or more parties who combine their money, property, knowledge, expertise or other resources in a single joint business enterprise, sometimes referred as a consortium, to bid together on a requirement. Respondents who bid as a joint venture must indicate clearly that it is a joint venture and provide the following information:
 - a. the name of each member of the joint venture;
 - b. the Procurement Business Number of each member of the joint venture, if applicable;
 - c. the name of the representative of the joint venture, i.e. the member chosen by the other members to act on their behalf, if applicable;
 - d. the name of the joint venture, if applicable.
2. If the information is not clearly provided in the bid, the respondent must provide the information on request from the Contracting Authority.
3. The bid and any resulting contract must be signed by all the members of the joint venture unless one member has been appointed to act on behalf of all members of the joint venture. The Contracting Authority may, at any time, require each member of the joint venture to confirm that the representative has been appointed with full authority to act as its representative for the purposes of the bid solicitation and any resulting contract. If a contract is awarded to a joint venture, all members of the joint venture will be jointly and severally or solidarily liable for the performance of any resulting contract.

7. LIMITATION OF SUBMISSIONS

1. A respondent may not submit more than one bid. This limitation also applies to the persons or entities in the case of a joint venture. If more than one bid is received from a respondent (or, in the case of a joint venture, from the persons or entities), all such bids shall be rejected and no further consideration shall be given.

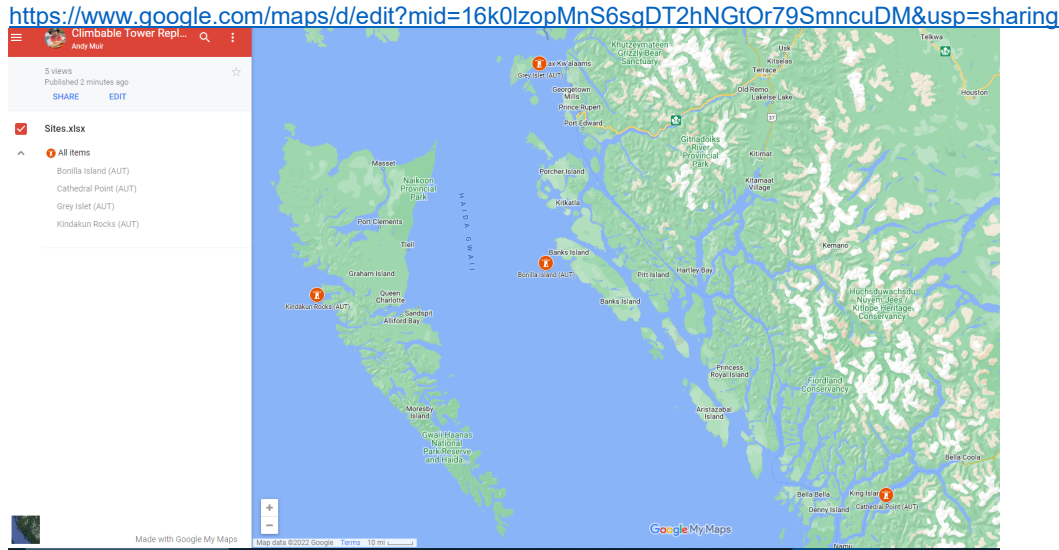

2. A joint venture is defined as an association of two or more parties which combine their money, property, knowledge, skills, time or other resources in a joint business enterprise agreeing to share the profits and the losses and each having some degree of control over the enterprise.
3. An arrangement whereby Canada contracts directly with a Contractor who may retain subcontractors to perform portions of the services is not a joint venture arrangement. A Subcontractor may, therefore, be proposed as part of the bidder team by more than one respondent. The respondent warrants that it has written permission from such Subcontractors to propose their services in relation to the services to be performed.
4. Notwithstanding paragraph 3. above, in order to avoid any conflict of interest, or any perception of conflict of interest, a respondent shall not include in its submission another respondent as a member of its team, as a Subcontractor.
5. Any joint venture entered into for the provision of professional services or other services must be in full compliance with the requirements of any provincial or territorial law pertaining thereto in the Province or Territory in which the project is located.

PHASE ONE QUALIFICATION FORM

PROJECT DESCRIPTION:

To engage the services of a contractor with the expertise and resources to provide design and construction of suitable foundation and guy anchors for tilting-pole anemometer towers located at Kindakun Rocks (AUT) 53.315600 -132.772000

The Meteorological Service of Canada tilting-pole anemometer tower (tilt-pole) is designated to expose the anemometer to conditions 10m above the surrounding surface and yet easily tilt down so that the sensors can be service by a technician standing on the ground.

SCOPE OF WORK

1. Geotechnical Assessment.
2. Detailed engineered foundation drawing specific to site.
3. Install Anemometer Tower foundation and anchors.

BACKGROUND

Meteorological Service of Canada (MSC) is responsible for installing and maintaining a network of coastal weather stations. One of the most important coastal weather parameters is wind, which is primarily measured by anemometers mounted 10m above the surface. These anemometers need annual maintenance and calibration checks. Historically they been mounted on climbable towers, or indeed any structure that gave close to 10m elevation above the local surface. Due to the chance of a fall, or the incapacitation of a technician on the tower, climbable anemometer towers have raised some significant Occupational Safety and Health concerns. In the mid-1990's a nation-wide program was begun to replace these climbable towers with tilting-pole towers, which enable a technician to service the anemometer while standing on the ground. There remain a handful of climbable wind towers on the west coast of British Columbia and the intent of this process is to replace climbable tower with tilting pole at Kindakun Rocks this fiscal year ending Mar 31, 2024.

CONDITIONS TO QUALIFY:

At Phase One closing, the respondent must:

- a) comply with the following Mandatory Requirements; and
- b) provide the necessary documentation to support compliance.

Mandatory Requirements:

1. Complete the Bidder's Contact Information
2. Complete the Qualification Form

Failure by the respondent to provide the required documentation in Phase One will result in the respondent being disqualified and no further consideration will be given to the respondent and the submission will be deemed non-responsive.

BASIS OF QUALIFICATION:

A qualification submission must comply with the mandatory requirements to be declared responsive in Phase One. Responding "no" to any of the mandatory requirements below will render your bid non-compliant and no further consideration will be given to the bid.

QUALIFICATION FORM

All fields must be completed in the qualification form or the response will be deemed non-compliant and no further consideration will be given. References will be contacted for confirmation of the information submitted. If the references cannot confirm the information submitted, the response will be deemed non-compliant and no further consideration will be given to the response.

Mandatory Requirements:

| ID | Parameter | Description | |
|----|---|--|---------------|
| M1 | Experience of Respondent | <p>The Respondent has 5 years of experience in undertaking design/build projects for the constructions of communication/utility tower base and anchor system Ex. Self supporting, monopoles towers.</p> <p>To demonstrate they meet this the respondent must respond yes in the right hand column</p> | Yes/No |
| M2 | Project Experience of the Respondent | <p>The Respondent has completed one design/build project for the constructions of communication/utility tower base and anchor system (Ex. Self supporting, monopoles towers) valued at \$100K or greater within the past 5 years.</p> <p>To demonstrate, the Respondent must complete the Project Tables below, include all requested information and respond to the three questions (Yes or No)</p> <p>If more than one (1) project is provided, only the first in the response package will be considered.</p> | |
| M3 | Experience as General Contractor | <p>The Respondent has a minimum of 5 year's experience leading multi-disciplinary construction projects, coordinating multiple sub-contractors, and has a successful record of managing schedule.</p> <p>To demonstrate they meet this the respondent must respond yes in the right hand column</p> | Yes/No |

| PROJECT TABLE 1: | |
|--|---|
| Project Start Date(YYYY/MM/DD): | Project 100% Completion Date(YYYY/MM/DD): |
| Project Location: | |
| Project Title: | |
| Was this project 100% completed in the past 5 years? | Yes or No |
| Was this project for the design/build construction of a communication/utility tower base and anchor system? | Yes or No |
| Was this project valued at \$100K or higher? | Yes or No |
| Provide an Owner's or Owner's Representative's name, email and phone number for authentication/verification of information presented. Name: | |
| Email: | |
| Phone #: | |
| Briefly describe the project (i.e.: cost, scope, size, distinguishing characteristics, etc.) | |

Failure by the respondent to provide the required documentation in Phase One will result in the respondent being disqualified and no further consideration will be given to the respondent and the submission will be deemed non-responsive.
