Amendment 002

This amendment 002 is raised to:

- a) Answer questions 2 to 5;
- b) Remove 3 criteria from the Point Rated Criteria;
- c) Modify the bid closing date

a) Questions and Answers

Q1: The RFP requires the proponent’s team to have at least one “Project Engineer resource”. Would ECCC please clarify whether a Canadian engineering license (P.Eng., P.L.Eng., etc.) is required for such resource? Or this resource can be a professional that does not hold a Canadian engineering license but has sufficient engineering experiences relevant to the proposed work.

A1: The Project Engineer must meet the academic requirement of having a university degree in engineering. Canadian engineering license (P.Eng.) is not mandatory.

Q2: We understand cooperate reference contracts are required to demonstrate bidder’s experience. For each team member in the proposed project team (Team Lead, Project Engineer, Project Financial Analyst), can individual CVs and references (previous employers and projects) be used in lieu of corporate reference contracts to demonstrate his/her relevant experiences? Or is the requirement that each team member’s experiences must be demonstrated in the corporate reference contracts submitted?

A2: For each team member in the proposed project team (Team Lead, Project Engineer, Project Financial Analyst), individual CVs and references (previous employers and projects) may be used in lieu of corporate reference contracts to demonstrate his/her relevant experiences.

Q3: Would ECCC please confirm the cost analysis will exclude the cost of hydrogen conversion (e.g., ammonia, liquid H2), transportation (e.g., truck, pipeline), and power generation end-use (e.g., H2-fired boilers, solid oxide fuel cells) downstream of the hydrogen production plant gate?

A3: The cost analysis will include cost of hydrogen conversion (e.g., ammonia, liquid H2), and transportation (e.g., truck, pipeline) of hydrogen from hydrogen production facility exit gate to the power generation (e.g., H2-fired boilers, solid oxide fuel cells) facility gate downstream of the hydrogen production plant gate.

Q4: Do you have a budget in mind?

A4: There is no defined budget and no mandatory financial criteria associated with this requirement.

Q5: To support assessing and placing the best possible resources on this project. Is there an alternative criterion that ECCC will consider for the Education Competency criterion that is based on experience and capability - particularly for the “Team Lead” and “Financial Analyst” positions where PhD education is not necessarily as relevant to the position requirements?

A5: The education criteria for each resource have been removed from the Point Rated Criteria

b) Remove 3 criteria from the Point Rated Criteria

Delete:

- **RR2** - The Team Lead/ Project Manager Competency education
- **RR4** – The Project Engineer education
- **RR6** – The Project Financial Analyst Education

c) Modify the Bid Closing date on page 1

DELETE: **November 30,2023 at 2 :00 pm EST**

INSERT: **December 8,2023 at 2 :00 pm EST**
