December 18th, 2023

**Subject: REQUEST FOR PROPOSAL # 30005088A Chemical Analysis of Sediment,
Tissue and Water.**

ADDENDUM #01

Further to the above- mentioned Request for Proposal, this Addendum (#01) is to advise potential bidders that the closing date for this tender call has been changed, and to respond to bidders questions.

DELETE: Closing Date: December 27, 2023

INSERT: Closing Date: January 05, 2024.

Questions and Answers:

Question 1:

The RFP seems to assert that meeting or exceeding the previous reporting limits for the samples analyzed in 2022 (presumably on a bid that was sole-sourced originally) is required and a mandatory pass/ fail on this RFP? Our limits could possible be lowered but not likely.

Answer 1:

The Limits for mercury and methylmercury analysis must be met as it is the focus of environmental concern in this project, whereas the ICP analysis we are willing to allow more latitude on. This is reflected in the bid Evaluation Criteria M3 and R1 for Limits for mercury and methylmercury analysis, and R2 for the ICP analysis.

This addendum shall form part of the above-mentioned RFP. All other terms and conditions of the said mentioned RFP shall remain unchanged and in force.
