ANNEX A - Statement of Work

1. Scope

The Contractor must provide one (1) Senior Materiel Management Specialist - Security Clearance: Secret to enhance and expand support to the Life Cycle Material Management (LCMM) of the SATCOM In-Service Support (SATCOM ISS) section as defined in Section 2.1.1 and Section 2.2.1 Tasks for the support of the Canadian Forces Strategic Communications and Information Systems.

1.1. Objective

SATCOM ISS is responsible for the ongoing support to Deployed Ops and key strategic SATCOM system upgrades. As SATCOM evolves and changes, new work requirements have identified the need for one (1) Senior Material Management Specialist to help with the preparation of low to complex levels of documentation, in the monitoring and replenishment of inventory assets, the management of surplus assets and the distribution of SATCOM equipment to ensure DND is capable of maintaining operational systems and service availability.

1.2. Background

- The SATCOM ISS Section provides the only sovereign strategic communication systems
 that supports domestic and expeditionary operations conducted by the Canadian Armed
 Forces (CAF). These communication systems form a vital part of the CAF Strategic
 Command and Control infrastructure, simultaneously providing SATCOM services to both
 domestic and deployed CAF locations.
- The emergence of new technology, the end of life and replacement of legacy equipment and the additional responsibilities and equipment to manage has increased at an unexpected rate. With this increase in the workload, SATCOM ISS has an immediate requirement for one (1) Senior Material Management Specialist to provide assistance support to the SATCOM Life Cycle Materiel Managers (LCMMs).
- This extra workload is generated by the unexpected increase of requirements for SATCOM equipment in support of operations. This has created a work overload for LCMMs to the point that they cannot fulfill their operational priorities with this additional workload.
- The SATCOM ISS Section maintains and safeguards the security and the availability of Canadian Forces Strategic Command, Control and Communications links through the provision of Life Cycle Material Management (LCMM) and engineering for the following systems:
- a. Satellite Communications systems;
- b. Radios and antennas;
- c. Microwave Links;
- d. Secured Video Teleconferencing;
- e. Canadian Defence Red Switch Network;
- f. Voice Telecommunications Services; and
- g. Deployed Operations Gateways.

Many of the above systems are remotely operated and are geographically diverse multi-station systems, which use a split-site station architecture. These systems are often custom designed, built to task and are installed and maintained on a daily basis both domestically and in theatre. To be able to maintain all those capabilities, SATCOM ISS manages a large number of spare parts, terminals, and sites.

2. Requirement

2.1. Scope of work for Senior Materiel Management Specialist

- Coordinating and managing the distribution or the disposal of spare parts and Satcom Terminals.
- Liaise and follow-up with various stakeholders including SATCOM LCMMs, SSC, IM Proc, DES Proc and PSPC on the completion of tasks and material management coordination in support of Fixed SATCOM.

2.1.1. Tasks for Senior Materiel Management Specialist

- 1. Search and identify suppliers/companies and request price quotations for the procurement of required equipment to sustain SATCOM systems and ongoing operations;
- Perform in a timely fashion and follow-up at all stages of the equipment procurement and management process and provide updates to the Technical Authority (TA) as required;
- 3. Communicate with the procurement personnel and all other groups involved in the process regarding issues at all stages of the procurement process, including post-contractual stages;
- 4. With minimal or no supervision, manage Fixed SATCOM's (multiple LCMMs) warehouse inventory including Satellite terminals, SATCOM auxiliary systems and spare parts;
- 5. Move and restack material when required using manual pallet lifts;
- Submit technical requests for new equipment using the LCMM area within the SAP DRMIS
 Application Portal for Material Identification Request and create NSNs and PSCNs as
 required for new equipment;
- 7. Develop material management procedures, provide written technical instructions and jobs aids:
- Provide advice to the LCMMs regarding life cycle strategies for asset acquisition and disposal, potential procurement strategies and post-contractual issues for a given requirement;
- 9. Prepare and compile reports capturing the status of inventory levels of assets;
