### B. Questions and Answers

- Q1.** Will concrete patching materials, such as those listed on the Alberta Transportation Approved product list for concrete patching materials (ex. SikaTop 122, SikaTop 123) be acceptable for use on the partial depth repairs? Will it also be acceptable to use these materials for all modified bearing seats? The project staging and quantities required make ready-mix concrete impractical.
- A1.** In the project specification (*EN - Specifications 23-0338.pdf*), Section 03 30 00 under Clause 2.4 MIXES, item 1.4, .6 allows the use of dry mix (pre-mix) concrete for substructure partial depth repairs and new concrete below the stringer bearings pending approval of the Departmental Representative. Other specific products can be reviewed after contract award.
- Q2.** Dwg 011 references CSA S6:19 for bearing fabrication. Please confirm that bearing fabrication does not also need to adhere to Alberta Transportation Standard Specifications for Bridge Construction – Edition 17, 2020?
- A2.** Bearing fabrication to CSA S6:19 is specified. Alberta Transportation Standard Specifications for Bridge Construction does not need to be adhered to for bearing fabrication.
- Q3.** Please clarify that QP2, QP6 and the 50% requirement of Industrial Coating Specialist will not be waived.
- A3.** In the project specification (*EN - Specifications 23-0338.pdf*), Section 09 91 13.23 EXTERIOR PAINTING OF STRUCTURAL STEEL, Item 3.1.1, requires testing of existing steel members for lead-based paint. If the existing paint contains lead, the requirements of Section 02 83 10 Lead-Base Paint Abatement - Minimum Precautions, for "QP2" will not be waived. Requirements of "50% requirement of the Industrial Coating Specialist" and "QP6" are related to painting and metallizing and will not be waived.
