PART 2 - BIDDER INSTRUCTIONS

2.1 Standard Instructions, Clauses and Conditions

As this solicitation is issued by Fisheries and Oceans Canada (DFO), any reference to Public Works and Government Services Canada or PWGSC or its Minister contained in any term, condition or clause of this solicitation, including any individual SACC clauses incorporated by reference, will be interpreted as reference to DFO or its Minister.

All instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out in the [Standard Acquisition Clauses and Conditions Manual](https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada.

Bidders who submit a bid agree to be bound by the instructions, clauses and conditions of the bid solicitation and accept the clauses and conditions of the resulting contract.

The [2003](#) (2022-03-29) Standard Instructions - Goods or Services - Competitive Requirements, are incorporated by reference into and form part of the bid solicitation.

Subsection 3.a) of Section 01, Integrity Provisions - Bid of the Standard Instructions [2003](#) incorporated by reference above is deleted in its entirety and replaced with the following:

- a. at the time of submitting an arrangement under the Request for Supply Arrangements (RFSA), the Bidder has already provided a list of names, as requested under the [Ineligibility and Suspension Policy](#). During this procurement process, the Bidder must immediately inform Canada in writing of any changes affecting the list of names“

Subsection 5.4 of [2003](#) (2018-05-22) Standard Instructions - Goods or Services - Competitive Requirements, is amended as follows:

Delete: 60 days
Insert: 120 days

2.2 Submission of Bids

Bids must be submitted by the date, time and place indicated on page 1 of the bid solicitation.

2.3 Enquiries - Bid Solicitation

All enquiries must be submitted in writing to the Contracting Authority no later than seven (7) calendar days before the bid closing date. Enquiries received after that time may not be answered.

Bidders should reference as accurately as possible the numbered item of the bid solicitation to which the enquiry relates. Care should be taken by bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that the Bidder do so, so that the proprietary nature of the question(s) is eliminated, and the enquiry can be answered to all bidders. Enquiries not submitted in a form that can be distributed to all bidders may not be answered by Canada.

2.4 Applicable Laws

Any resulting contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in the Gulf Region.

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Bidders.

2.5 Bid Challenge and Recourse Mechanisms

- (a) Several mechanisms are available to potential suppliers to challenge aspects of the procurement process up to and including contract award.
- (b) Canada encourages suppliers to first bring their concerns to the attention of the Contracting Authority. Canada's [Buy and Sell](#) website, under the heading "[Bid Challenge and Recourse Mechanisms](#)" contains information on potential complaint bodies such as:
 - Office of the Procurement Ombudsman (OPO)
 - Canadian International Trade Tribunal (CITT)
- (c) Suppliers should note that there are **strict deadlines** for filing complaints, and the time periods vary depending on the complaint body in question. Suppliers should therefore act quickly when they want to challenge any aspect of the procurement process.

ANNEX "A" STATEMENT OF WORK

1. Title:

Electronic Monitoring (EM) Systems and Services

2. Background:

In 2022, the Gulf Conservation and Protection (C&P) team conducted a field study with modern camera technology - 2022 Tuna Camera EMS Pilot Project:

The purpose of the study was to field test modern camera equipment as a replacement to the dated camera technology that is used in the fishery today.

For an EM model to be considered a viable option for fleet-wide implementation, there is a need to identify a system that is less labor intensive to DFO and sustainable for fleet-wide implementation. The current system is not. Ultimately, the purpose of having camera equipment deployed in this fishery is to monitor compliance for the Fisheries Act and applicable Regulations.

3. Objective:

The Department of Fisheries and Oceans (DFO) requires the services of a Contractor to supply and install EM equipment on participating vessels for field testing purposes.

DFO has identified a requirement to have two (2) systems deployed on two (2) separate vessels during each period. The periods are during the spring/summer fisheries and the mid-summer/early fall fisheries.

- Period 1 – July 1, 2023 to March 31, 2024
- Period 2 – July 1, 2024 to March 31, 2025

There is an opportunity to re-use the equipment from the spring fisheries on the summer fisheries, reducing the total amount of equipment needed. A rotation of cameras will be permitted.

The equipment that will be used as part of this pilot will not be purchased by DFO and will be the property of the Contractor and will be returned upon de-installation.

4. Deliverables:

- 4.1 The Contractor must provide and install the equipment that is capable of providing live video monitoring services 24 hours a day, seven days a week. The Contractor must be able to utilize wireless data transmission technology (cellular and/or satellite) and have the data accessible to view a "live feed" of video 24 hours a day, seven days a week.

To note: The footage will be used to determine the feasibility of the equipment in a field setting. It will not be used for enforcement purposes.

DFO will review the footage and evaluate the quality and capability of the equipment being tested.

- 4.2 The Contractor must also be capable to store the videos and provide access to view by DFO until June 30, 2024, following transmission from the vessel to the Contractor's server. The Contractor must be able to troubleshoot various scenarios that might arise as cameras will be mounted on the vessel travelling out to sea for extended periods of time.
- 4.3 The Contractor will provide the software to be utilized to display the footage and the software must have the ability to employ artificial intelligence learning, as well as have the potential to identify segments of footage that entail points of the fishing trip that is of interest to DFO.
- 4.4 The Contractor must provide access to the software for DFO to view the footage 24 hours a day, seven days a week, as required, and:
 - provide access to saved video and view live-feed camera footage anytime, anywhere via secured website portal (specific to username and password which would be available to DFO and the volunteers)
 - provide off-site video storage and back-up options of video surveillance
 - provide 24/7 desktop and mobile access to the surveillance cameras as well as technical support as required
 - provide a full video system surveillance system (all required equipment, such as cameras and centralized hard drive).

DFO is the only authorized entity to access and view the footage that is collected as part of this project, as well as any individuals DFO authorizes, such as the volunteers implicated in the project. This user interface must be able to display the footage collected in a logical, sequential manner that displays time and date, latitude and longitude and vessel name.

5. Tasks:

- 5.1 The Contractor will provide fishery monitoring footage as required and requested to DFO. DFO will be granted full access and user rights to all footage and information.
- 5.2 The Contractor will perform and complete the installation, with minimal damages, of video monitoring equipment on participating vessels.
- 5.3 The Contractor will install two (2) cameras per vessel, the centralized hard drive, the cellular data transmission, the cloud storage management system, as well as provide the necessary access to DFO for reviewing the footage, installation and uninstallation.
 - The Contractor must include cost of travel in their pricing. The anticipated areas that these systems are to be deployed in the Gulf Region are as follows:
 - New Brunswick
 - Prince Edward Island

- A DFO representative will be on site to monitor the installation process.
- 5.4 The Contractor will also be responsible to perform the de-installation of the video monitoring equipment on all participating vessels. Any modifications that were made as part of the installation will be repaired at the time of the de-installation. A DFO representative will be on site to monitor the de-installation and repair process.
- 5.5 The Contractor will provide the required hardware for two systems (four (4) cameras in total) to be deployed on two (2) separate vessels during each period, and will outsource any specific equipment or services as required to meet DFO requirements. All monitoring equipment must be able to withstand all weather conditions and temperatures as they will be mounted on vessels.
- 5.6 The Contractor will perform trouble shooting analysis, and repair when required, to keep monitoring equipment functioning throughout the test. If the trouble shooting is not repairable virtually, the contractor will be responsible for in-person repair.
