HVAC PLAN

DESCRIPTION

MECHANICAL EQUIPMENT SCHEDULE

RFI MITIGATION/SHIELDING REQUIREMENTS

- RFI MITIGATION AND SHIELDING REQUIREMENTS IS TO BE DONE BY DEPARTMENTAL REPRESENTATIVE.

GENERAL NOTES

- IN GENERAL, PROJECT INTENT IS TO PROVIDE 2 NEW AIR HANDLING UNITS (RTU) TO SERVE THE NEW SPANMASTER BUILDING. THE RTUS SHALL MAINTAIN PROPER TEMPERATURE AND VENTILATION TO SUPPORT THE FACILITIES MANUFACTURING PROCESS. THE SITE IS HYPER SENSITIVE TO RADIO FREQUENCY INTERFERENCE (RFI) AND IT ITS CRITICAL FOR THE CONTRACTOR AND EQUIPMENT MANUFACTURER TO UNDERSTAND THE AFFECTS OF ANY NEW EWUIPMENT THAT EMITTS RFI.
- THE EXISTING DRAWINGS HAVE BEEN PREPARED, IN PART, ON THE BASIS OF INFORMATION COMPILED AND FURNISHED BY OTHERS.
- COORDINATE THE DRAWINGS WITH THE 3. SPECIFICATIONS. IN CASES WHERE CONFLICTS OCCUR THE MOST STRINGENT REQUIREMENT SHALL APPLY.
- MAGNITUDE OF SCOPE OF WORK ON THIS PROJECT SHALL NOT BE BASED SOLELY ON PREPARED CONSTRUCTION DOCUMENTS (DRAWINGS AND SPECIFICATIONS), AS THESE DOCUMENTS ARE OF A DIAGRAMMATIC AND GENERALLY DESCRIPTIVE NATURE, AND LIMITED IN THE AMOUNT OF DETAILS SPECIFIC TO EXISTING SITE CONDITIONS. THEREFORE A "SITE WALK- THROUGH" IS STRICTLY "MANDATORY", PRIOR TO PRICING. FURTHER SITE VERIFICATION WILL BE ALSO REQUIRED UPON CONTRACT AWARD.
- "MANDATORY SITE WALK-THROUGH" SHOULD INCLUDE NOT ONLY "PRIME" MECHANICAL TRADES (SUCH AS MECHANICAL CONTRACTORS), BUT ALSO SUB-TRADES (AT A MINIMUM SHEET METAL CONTRACTOR, ELECTRICAL CONTRACTOR, CONTROL CONTRACTOR, AND STEEL CONTRACTOR ARE REQUIRED TO ATTEND "MANDATORY SITE WALK-THROUGH" AS WELL).
- MECHANICAL CONTRACTOR WILL BE RESPONSIBLE FOR HIRING ALL OTHER REQUIRED TRADES TO COMPLETE THE PROJECT, AND WILL BE RESPONSIBLE FOR OVERSEEING THE WORK OF SUB-TRADES AND ENSURING THEIR COMPLIANCE WITH SITE SAFETY REGULATIONS.

11.

- THE ELECTRICAL SCOPE OF WORK SHALL BE CARRIED BY THE MECHANICAL CONTRACTOR AND SHALL BE DESIGN BUILD BY THE ELECTRICAL CONTRACTOR. ALL NEW ELECTRICAL EQUIPMENT SHALL BE LABELLED TO MAINTAIN CONSISTENCY WITH THE EXISTING LABELLING SYSTEM IN THE BUILDING. ALL DISCONNECTS SHALL BE PROVIDED WITH LAMACOID LABELS. COORDINATE WITH OPERATIONS STAFF AS REQUIRED.
- CONTRACTOR IS RESPONSIBLE FOR REVIEW AND VERIFICATION OF ACTUAL ONSITE CONDITIONS, AND EQUIPMENT LOCATIONS.
- CONTRACTOR TO REFER TO "ANVIL" PRODUCT CATALOGUE FOR ALL HANGER & SUPPORT FIGURES.
- 10. ALLOW FOR DEMOLITION BINS. COORDINATE WITH NRC FACILITY MAINTENANCE OPERATION PERSONNEL.
- PROVIDE 100MM HIGH CONCRETE CURBS FOR ALL FLOOR MOUNTED MECHANICAL EQUIPMENT. 12. NBC-2020 SHOULD BE REFERENCED.

- SHEET METAL WORK:
- ALLOW FOR ALL SHEET METAL WORK TO ACCOMMODATE INSTALLATION OF "NEW" AND "TEMPORARY" SYSTEMS (AS WELL AS EXISTING SYSTEMS THAT ARE REMOVED AND RE-NSTALLED). REFER TO DRAWINGS AND SPECIFICATION FOR ADDITIONAL INFORMATION ON SCOPE OF WORK.
- ALLOW FOR INSTALLATION OF "ACCESS DOORS" AS 13 REQUIRED TO SERVICE HVAC EQUIPMENT, REGARDLESS IF DRAWINGS CALL FOR THEM OR NOT. ALSO PROVIDE A MEAN OF ACCESS (FOR SERVICING AND MAINTENANCE) FOR EXISTING EQUIPMENT, AS REQUIRED, AS A RESULT OF NEW EQUIPMENT INSTALLATIONS.
- ALL SHEET METAL WORK IS TO BE INSTALLED IN 14. ACCORDANCE WITH THE LATEST "SMACNA" STANDARD.
- **INSULATION WORK:** PROVIDE INSULATION AND LABELLING FOR ALL NEW 15. PIPING.
- PROVIDE INSULATION FOR ALL NEW PIPING, C/W CANVAS 16. JACKETING IF INSIDE, OR C/W ALUMINUM JACKETING IF LOCATED OUTSIDE.
- PROVIDE INSULATION ON ALL NEW EXTERIOR DUCTWORK. 17 IN GENERAL ALL NEW DUCTWORK IS TO BE ACOUSTICALLY INTERNALLY LINED EITHER BY "FIBERGLASS-FREE" INTERNAL LINER OR TO PROVIDE ALPHA CLOTHING OVER FIBERGLASS INTERNAL LINER.
- REFER TO DRAWINGS AND MECHANICAL SPECIFICATION FOR ANY ADDITIONAL REQUIREMENTS ON INSULATION SCOPE OF WORK.
- FIRE STOPPING, ETC .:
- PROVIDE FIRE STOPPING AND SEALING FOR ALL 19. PENETRATIONS THROUGH FIRE-RATED AND SMOKE-RATED ASSEMBLIES. NO PIPING IS TO BE INSTALLED RUNNING IN FIRE-RATED VERTICAL SHAFTS. REFER TO MECHANICAL SPECIFICATION FOR ADDITIONAL INFORMATION ON FIRE STOPPING REQUIREMENTS.
- ALL MATERIALS AND INSULATION SHALL COMPLY WITH 20. NCC CODE REQUIREMENTS (FLAME SPREAD AND SMOKE DEVELOPMENT REQUIREMENTS; 25/50 RATING). COMMISSIONING:
- ALL NEW SYSTEMS ARE TO BE COMMISSIONED. 21.
- CONTRACTOR TO PROVIDE OWN COMMISSIONING AGENT. 22. THE COMMISSIONING AGENT IS RESPONSIBLE TO PRE-POPULATE THE COMMISSIONING FORM PRIOR THE COMMISSIONING AND ADJUST CONTROL SEQUENCE BASED ON THE PROJECT SPECIFICS. DEPARTMENTAL REPRESENTATIVE TO WITNESS AND PERFORM SPOT CHECKS TO ENSURE THAT COMMISSIONING HAS BEEN PROPERLY IMPLEMENTED. COMMISSIONING AGENT HAS AN ESSENTIAL ROLE IN COORDINATING AND WORKING CLOSELY WITH ALL INVOLVED TRADES/PARTIES. ENSURING THAT PROJECT (SYSTEMS) MEETS DESIGN INTENT FROM OPERATIONAL AND FUNCTIONALITY PROSPECTIVES AND MEETS CONSTRUCTION SCHEDULE. THEREFORE COMMISSIONING AGENT SHALL ALLOW FOR ADEQUATE TIME THAT COMMISSIONING PROCESS WILL TAKE FOR A PROJECT OF THIS NATURE. THIS PROJECT HOLDS A CERTAIN LEVEL OF COMPLEXITY DUE TO PHASING AND INTEGRATION FEATURES.

BALANCING:

- 23. NOT USED
- PRIOR TO ANY NEW WORK STARTING, RECORD 24. EXISTING AIR FLOWS ON ALL EXISTING TERMINALS BEING PART OF EXISTING SUPPLY AND EXHAUST SYSTEMS THAT ARE TO BE REMOVED AND INSTALLED AS NEW. ONCE THE NEW SYSTEM IS INSTALLED, BALANCE SYSTEM TO EXISTING FLOWS (OR TO NEW FLOWS), AS INSTRUCTED BY ENGINEER OR INSTRUCTED ON DRAWINGS.

CONTROLS:

- CONTROLS ON THIS PROJECT SHALL BE SOLELY 25. "RELIABLE CONTROLS" PRODUCT (TO MATCH BASE BUILDING CONTROLS).
- THE CONTROLS CONTRACTOR MUST BE ABLE TO 26. RESPOND TO THE SITE WITHIN A 90 MINUTES TIMEFRAME UPON BEING CONTACTED, 24/7 AND BE WITHIIN A 90KM OF THE PROJECT SITE.
- CONTROLS CONTRACTOR TO ALLOW FOR ANY 27 CONTROLS WORK (NOT BEING MENTIONED BELOW OR LISTED IN "DDC POINTS LIST") THAT THEY ANTICIPATE WOULD BE REQUIRED TO MEET DESIGN INTENT. REFER TO DRAWINGS AND SPECIFICATION FOR DESIGN INTENT
- CONTROLS WORK SHALL INCLUDE NOT ONLY 28. CONTROLS ASSOCIATED WITH NEW EQUIPMENT INSTALLATION, BUT SHALL ALSO INCLUDE ANY OTHER REQUIRED/NECESSARY WORK RELATED TO THE DEMOLITION OF EXISTING SYSTEMS AND ASSOCIATED CONTROLS TO ACCOMMODATE NEW EQUIPMENT INSTALLATION AND TO MEET DESIGN INTENT.
- CONTROLS WORK SHALL ALSO INCLUDE CREATION 29. OF NEW DDC GRAPHICS, TREND LOGS, SEQUENCES, ETC. AS WELL AS ANY RE&RE OF ANY NECESSARY EXISTING CONTROL SEQUENCES, TREND LOGS AND DDC GRAPHICS TO MEET DESIGN INTENT.
- CONTROLS CONTRACTOR TO RETAIN ELECTRICAL 30. CONTRACTOR AS REQUIRED FOR ALL REQUIRED (IF ANY) NEW ELECTRICAL WORK ASSOCIATED WITH THIS PROJECT SCOPE OF WORK.
- BOTH RTU-1 AND RTU-2 SHALL RETAIN ALL EXISTING 31. CONTROL POINTS FROM THE EXISTING BAS AND PROVIDE NEW POINTS AS REQUIRED TO MEET DESIGN INTENT. REFER TO DETAIL 3/M-3 FOR EXISTING CONTROL POINTS. AT A MINIMUM, NEW CONTROL POINTS WILL BE REQUIRED FOR THE REVERSING VALVE.
- THE NEW RTUS SHALL MIRROR THE EXISTING RTU SEQUENCE OF OPERATION SCHEDULE. PROVIDE NEW/MODIFY THE EXISTING LOGIC SUCH THAT THE 1ST STAGE OF HEATING WILL BE VIA HEAT PUMP UNTIL THE AMBIENT TEMPERATURE IS BEYOND THE OPERATING RANGE THEN STAGE 2 HEATING WILL BE VIA PROPANE FIRED SECTION TO MAINTAIN SET-POINT. THE BMS WILL COMMAND THE REVERSING VALVE POSITION BASED ON THE OUTDOOR AIR TEMPERATURE.
