If you have any concerns relating to the procurement process, please refer to the [Bid Challenge and Recourse Mechanisms](#) page on the Buyandsell.gc.ca website. Please note that there are strict deadlines for filing complaints with the Canadian International Trade Tribunal (CITT) or the Office of the Procurement Ombudsman (OPO).

Where the words "must", "shall" or "will" appear in this RFP, the clause is to be considered as a mandatory requirement.

## PART 2 - BIDDER INSTRUCTIONS

### 2.1 Standard Instructions, Clauses and Conditions

All Citizenship and Immigration Canada (CIC) instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out on the [CIC Website](#).

All SACC manual clauses for specific instructions not covered by the standard instructions identified in the bid solicitation by number, date and title are set out in the [Standard Acquisition Clauses and Conditions Manual](#) issued by Public Works and Government Services Canada.

### 2.2 Submission of Bids

### 2.3 Enquiries - Bid Solicitation

All enquiries must be submitted in writing to the Contracting Authority no later than **10** calendar days before the bid closing date. Enquiries received after that time may not be answered.

Bidders should reference as accurately as possible the numbered item of the bid solicitation to which the enquiry relates. Care should be taken by Bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the questions or may request that the Bidder do so, so that the proprietary nature of the question is eliminated, and the enquiry can be answered with copies to all Bidders. Enquiries not submitted in a form that can be distributed to all Bidders may not be answered by Canada.

Any resulting contract must be interpreted and governed, and the relations between the parties determined by the laws in force in [Ontario](#).

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Bidders.

If the answer to the questions and, as applicable the information required have not been received by the time the evaluation of bids is completed, Canada will inform the Bidder of a time frame within which to provide the information. To avoid duplication, Bidders may refer to different sections of their bids by identifying the specific paragraph and page number where the subject topic has already been addressed.

#### **4.1.4 Substantiation of Professional Services Rates**

In Canada's experience, bidders will from time to time propose rates at the time of bidding for one or more categories of resources that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. When evaluating the rates for professional services bids, Canada may, but will have no obligation to, require price support for any rates proposed (either for all or for specific resource categories). Examples of price support that Canada would consider satisfactory include:

- a) documentation (such as billing records) that shows that the Bidder has recently provided and invoiced another customer (with whom the Bidder deals at arm's length) for services similar to the services that would be provided by the relevant resource category, where those services were provided for at least one month and the fees charged are equal to or less

than the rate offered to Canada (to protect the privacy of the customer, the Bidder may black out the customer's name and personal information on the invoice submitted to Canada);

- b) a signed contract between the Bidder and an individual qualified (based on the qualifications described in this bid solicitation) to provide services under the relevant resource category, where the amount payable under that contract by the Bidder to the resource is equal to or less than the rate bid for that resource category;
- c) a signed contract with a subcontractor who will perform the work under any resulting contract, which provides that the required services will be provided at a rate that is equal to or less than the rate bid for the relevant resource category (and where the resource meets all the qualifications described in this bid solicitation); or
- d) details regarding the salary paid to and benefits provided to the individuals employed by the Bidder qualified (based on the qualifications described in this bid solicitation) to provide services under the relevant resource category where the amount of compensation, when converted to a per diem or hourly rate (as applicable), is equal to or less than the rate bid for that resource category.

Once Canada requests substantiation of the rates bid for any resource category, it is the sole responsibility of the Bidder to submit information (either the information described in the examples above, or other information that demonstrates that it will be able to recover its own costs based on the rates it has proposed) that will allow Canada to determine whether it can rely, with confidence, on the Bidder's ability to provide the required services at the rates bid, while, at a minimum, recovering its own costs. Where Canada determines that the information provided by the Bidder does not demonstrate the Bidder's ability to recover its own costs in providing the relevant resource, Canada may declare the bid non-compliant, if the rate is at least **20%** of or lower than the median price bid by compliant bidders for the first year of the resulting contract for the relevant resource(s). Only the Firm Per Diem Rates of proposals that are technically responsive will be considered.

## **4.2 Basis of Selection**

### **4.2.1 Basis of Selection - Lowest Evaluated Price**

A bid must comply with the requirements of the bid solicitation and meet all mandatory evaluation criteria to be declared responsive. Each responsive bid will be listed, in order, from the lowest to the highest evaluated price indicated in the "TOTAL EVALUATED PRICE" in Appendix E – Basis of Payment.

The bidder with a responsive bid and the lowest evaluated price will be subject to the Digital Radio Airtime Field Test (DRAFT). Upon successfully passing the DRAFT, the lowest responsive bid will be recommended for contract award.

Should the lowest price responsive bidder fail the DRAFT or unable to perform the DRAFT within five (5) working days of being contacted by CIC, the bidder with the next lowest price responsive bid will then be subjected to the DRAFT. This process will be repeated until a bidder successfully passes the DRAFT.

See attachment 1 of Part 4 for the details of the Digital Radio Airtime Field Test (DRAFT)

**Attachment 1 of Part 4: Digital Radio Airtime Field Test (DRAFT)**

CIC will conduct the following field test in order to make a determination on the bids submitted as a result of a competitive process to test the functionality of the radio system provided. This will allow CIC security personnel to determine the success of the lowest compliant bid. Lowest compliant bid must be able to conduct the DRAFT within five (5) working days after being contacted by CIC; otherwise the bid will be considered non-compliant.

**Bidder Supplied Equipment:**

Four (4) radios, fully charged  
Two (2) base stations

**Bidder to provide:**

Bidder must provide one (1) system-certified technician onsite to assist with any issues for the duration of the field test.

**Test criteria:**

All radios and devices **will be tested for Digital transmissions only.**

One (1) radio and one (1) base station will be located within 365 Laurier West, Ottawa, Ontario, and will serve as the control centre for this test. Another base station will be located within 70 Crémazie, Gatineau, QC and will serve as the 2<sup>nd</sup> control centre for this test. All radio communications will be sent and received from both locations. The test sheet will be kept at these locations, in order to register the results of the tests;

Two (2) radios will be used in the field at various preselected sites;

One (1) radio will be located with the CIC Security representative, in order to perform the test to confirm Mandatory Requirement 4.5.6, (a busy signal will not be acceptable at any time). This refers to our requirement that a third person on one of the provided two-way radios is able to break into an ongoing transmission, in the case of extreme duress or emergency. At no time should a CIC radio operator receive a busy signal, or fail to be able to transmit and receive, regardless of existing traffic on that channel; and

A total number of fifteen (15) locations (floors/areas) have been chosen in two CIC buildings with one being located in Ottawa, Ontario, and the other one located in Gatineau, Quebec. These locations have been chosen due to their physical location, and technical difficulties which have historically been experienced with the previous analog radio system. One (1) two-way radios will travel with a selected employee to these various locations to perform the tests. Results will be logged by the two control centres. If it is suspected that a transmission did not register, a follow up phone call will be initiated to verify that the receiver did not receive the transmission. Each test conversation will have a duration of 15 seconds during which no interference or signal loss must occur.

**Rating guide:**

Zero (0) value will be assigned as a test result for any site where the communication is either:

- Not received;
- Received very poorly, so as not to be able to carry out a comprehensible conversation;
- Signal is lost.

One (1) value will be assigned as a test result for any site where the communication is:

- Successful, clear and signal is available.

Each individual location will be scored on a 0 or 1 scale, using the following example:

| Locations                    | 365 Laurier Control Centre<br>Transmission Rating (Circle result) | 70 Crémazie Control Centre<br>Transmission Rating (circle result) |

| Totals                                      |   |   |

The scores from the two control sites will be added together to get a final result out of a possible 30 points. A pass mark of **21/30 (70%)** will be considered a successful completion of this test. The final result will be provided to the contracting authority within two business days of the field test.

## APPENDIX "D", STATEMENT OF WORK

**D1. Title: Leasing of 55 Portable Two-Way Digital Radios, associated accessories, and unlimited air time.**

**D2. Objective**

Citizenship and Immigration Canada (CIC) requires fifty-five (55) portable two-way digital radios, associated accessories, unlimited airtime and 24/7 technical support to upkeep its operations in the National Capital Region (NCR).

CIC must upgrade the aged communication system to allow CIC security personnel in the NCR to communicate with each other effectively. To accomplish this goal, equipment and a broadcast/wireless support system must be in place and maintained. The units would connect all elements of security and allow CIC Corporate Security to coordinate with their front line guard force during emergencies providing 24/7 emergency management and response to CIC buildings in the NCR.

**D3. Background**

Mandatory under the Canada Labour Code Part 2 and the Policy on Government Security (PGS), Departments must ensure security, protection, health and safety of its employees and visitors to its premises. In order to comply with legislations, CIC NHQ Corporate Security must continue to ensure its communication system is operational 24/7.

Due to the ever changing technology and wear and tear of equipment, purchasing of a complete two way radio system, including repeaters, base station, access fee and air time has proven to be costly. Renting of a digital two-way radio system which includes replacement of any broken or aging equipment is the most cost effective solution.

**D4. Requirements**

- 4.1.5 Repeaters as required at no extra cost to CIC
- 4.1.6 Fifty-five (55) belt clips compatible with the radios.
- 4.1.7 Ten (10) rechargeable spare batteries (All batteries provided must be new, unused and must not be a discontinued model)
- 4.1.8 Ten (10) earpieces (audio only)
