## 1 Introduction

---

The National Capital Commission is proceeding with an invitation to tender for the provision of janitorial services, sanitary waste management and litter control required for the operation and maintenance of the Rideau Canal Skateway.

The NCC is contracting out the provision of these services and materials with the objective of obtaining high standards of service excellence.

### 1.1 Context

---

#### 1.1.1 The Capital Stewardship Branch

---

The National Capital Commission (NCC), through its Capital Stewardship (CS) Branch, manages the natural and built facilities and assets in the National Capital urban area. These facilities and assets contribute to Ottawa’s rich symbolic setting as the seat of national government. The CS Branch manages and protects these assets to provide a safe and enjoyable experience for all users.

The CS Branch manages contracts which provide high quality maintenance services for the Commission’s urban sites as well as summer and winter maintenance of major federal institutions in the Capital, such as Parliament Hill. Effective operation, protection, maintenance, and lifecycle management is required for a diverse mix of urban assets ranging from urban conservation areas, green spaces, parkways, downtown parks, pathways, monuments, and buildings of national significance. The overall objectives of the maintenance practices are to protect and preserve these for all Canadians. In achieving these objectives, the NCC is committed to planning, developing, and implementing all its programs and activities in a manner designed to minimize adverse effects on the environment and ideally enhance the environmental resources under its responsibility.

The CS Branch also delivers visitor products and services such as the Floral Program, the Rideau Canal Skateway and the Sunday Bike day program. As part of its mandate, CS delivers support services to events that enhance the positioning of the Capital as a key destination for Canadians.

#### 1.1.2 Rideau Canal Skateway

---

The pride of Canada’s Capital Region is the Rideau Canal, which stretches 202 kilometres from Ottawa to Kingston. It was designated a World Heritage Site by UNESCO (United Nations Educational, Scientific and Cultural Organization) in June 2007. Each winter a portion of this historic waterway is transformed into the world’s largest skating rink. Crowds of skaters and outdoor enthusiasts from all over Canada and the world enjoy the 7.8 kilometres ice surface that winds through the heart of Ottawa. In 2005, Guinness World Records confirmed that the Rideau Canal Skateway (RCS) was indeed the “Largest Naturally Frozen Ice Rink in the World”.

The RCS will celebrate its 54<sup>th</sup> skating season in 2024, yet it is so much more than just a skating rink. You’ll find concession stands and other services including skate and sled rentals, shelters, washrooms, and rest areas. The Skatetrack also serves as center stage for Winterlude, the Capital’s internationally renowned festival and North America’s greatest winter celebration.

The Rideau Canal is one of Canada's nine heritage canals and is owned by Parks Canada. The Skateway portion is managed by the NCC during the winter months.

The skating season may start between Christmas and New Year's Day, weather permitting. The opening of the Skateway is determined by weather and ice conditions and an average season is about 40 skating days. The NCC Ice Safety Committee (ISC) assesses the ice thickness before the official opening of the RCS. This Committee continuously monitors ice conditions throughout the skating season.

## 1.2 Term of Contract

---

This Upset Limit Contract (based on submitted unit/hourly rates) is for a four (4) Year Term commencing on signing of the Contract (Fall 2023) and ending on March 31<sup>st</sup>, 2027.

## 1.3 Scope of Work

---

The services required are summarized below, but not limited to the following:

- Chalet and washrooms cleaning (janitorial including supplies)
- Minor Maintenance tasks on an as requested basis.
- Sanitary waste and freshwater management and disposal.
- Monitoring of fire extinguishers, door hinges and light bulbs.

## 1.4 Contract Boundaries

---

The Contractor shall provide all services within the geographic boundaries as summarized on the maps presented in Appendix 1 (Chalet location maps). Although not included on the maps, it is understood that the NCC warehouse at Woodroffe is within the boundaries of this Contract.

### 2.7.11 Disputes

---

It is the non-binding intention of the parties that where a dispute arises between the parties in connection with the Contract, the parties shall attempt to resolve the dispute by negotiating in good faith and where possible by retaining an expert to help resolve the dispute, provided that failure to do so shall in no way affect the jurisdiction of an arbitrator to arbitrate such a dispute. Any modifications to this plan must be presented to the NCC. A report for each toxic spill must be forwarded to the NCC as soon as possible.

## 4 Operation and Maintenance Requirements

---

The RCS is visited by hundreds of thousands of people every season. Weekday attendance is lower and can vary significantly. As would be expected, Winterlude weekends are the busiest where daily total visits regularly exceed 50,000 and have been known to reach 100,000 over a 32-hour period. It is possible that a washroom sees up to 300 visits per hour. The NCC's research has shown that on average, visitors will spend slightly less than 2 hours on the RCS during each of their visits. It is also worth noting that on average, fifty to sixty per cent of the total weekly visits to the RCS take place on weekends.

### 4.1 General

---

### 4.2 Chalets and Washroom Cleaning & Minor Maintenance

---

When the RCS is open to the public, the contractor must unlock the chalets according to the schedule indicated (iii). In addition to unlocking and locking the chalets on a daily basis, the contractor must clean the Chalets at regular intervals during the day in order to maintain their overall cleanliness.

The Contractor shall:

- i) Thoroughly clean the NCC chalets and washrooms once before they are craned into place in the fall (October) **and** once at the end of the season, after they have been removed from the RCS and brought to the NCC storage facility on Woodroffe Avenue (May or June). The NCC will determine which cleaning will take precedence during any given Year of the Term.
- ii) Supply the labor, cleaning products and materials required to execute the tasks described.
- iii) Open and close the chalets and washrooms on a daily basis as per the following schedule:

	<b>Open</b>	<b>Close</b>
Monday to Thursday	08:00	22:00
Friday & Saturday	08:00	23:00
Sunday	08:00	22:00

- iv) Maintain the cleanliness of the Chalets and washrooms at all times when they are open to the public. Overall cleanliness of the chalets must be maintained including: mopping, sweeping, wiping down soiled areas, cleaning toilets and sinks, emptying waste receptacles and sanitary napkin containers, replenishing washroom supplies such as toilet paper and hand soap, cleaning counter top surfaces, doors handles, mirrors, etc. The frequency of monitoring and cleaning must be adjusted according to the volume of visitors. Cleanliness of the facility must be maintained at all times.
- v) The Contractor must keep a maintenance log in the washrooms that specifies the time the washrooms were cleaned, the initials of the cleaner, and the findings and actions taken.
- vi) Visitor attendance will increase during the weekends, on Family Day Monday and especially during the three weekends of Winterlude. Consequently, the contractor will be required to augment the frequency of monitoring and cleaning services during those peak periods and any other peak periods that may develop or be identified by the NCC in consultation with the Contractor.
- vii) Monitor, and when required, replace interior and exterior light bulbs. Report faulty or burned out bulbs to the NCC.

- viii) Monitor fire extinguishers on a daily basis (minimum) and replace if required. NCC will supply fully charged fire extinguishers as required.
- ix) If, when locking the chalets at the designated closing time, objects of little value are left in the chalets (such as boots, mittens, coats, etc.), the contractor will place such items outside near the door or ramp of the chalet in question before locking the door. Upon returning to unlock the chalets the following morning, if some (or all) of the items are still where they were left, the contractor will bring the items to the lost and found box located at Fifth Avenue.
- x) At the request of the NCC, the Contractor may be asked to perform minor repairs and maintenance to the interior or exterior of the Chalets. Such repair would require skills and tools generally associated with general carpentry and painting.

Typical resources

- Staff and vehicles.
- Cleaning products (once approved for use by the NCC).
- Biodegradable toilet paper (once approved for use by the NCC).
- Hand soap and hand sanitizer.
- Cleaning tools (mops, brushes, squeegees, etc.).
- Small tools and materials necessary for carpentry or painting.

### 4.3 Litter Control

---

When ice conditions permit it, the Chalets and the RCS is open to the public as per the hours of operation indicated in 4.2 iii). Litter collection and control in the chalets and on the entire length of the RCS must be maintained during hours of operation. See Appendix 1 - GIS Maps for boundaries. Litter control services must be maintained from one (1) week prior to the opening of the RCS until two (2) weeks after its official closing. The approximate<sup>1</sup> inventory of waste, compost and recycling containers used on the RCS is as follows;

Type	Quantity in 2022-2023
Duel Waste Receptacles	44
Large Waste/recycling/compost stations	16
Small Waste/recycling/compost stations in the chalets and washrooms	23

The Contractor shall:

- i) Supply all the labor and materials required to execute the Work.
- ii) Pick up and remove all organic and inorganic materials, including but not confined to, paper, glass, plastic, metal, condoms, syringes, leaves, cigarette butts, animal excrement, etc.
- iii) Pick up waste, recyclable, and compost materials generated by the concession operators along the RCS.
- iv) Pick up waste, recyclable and compost materials generated by the public along the RCS.
- v) All collected debris should be disposed of at a recognized, licensed disposal facility.
- vi) Cold ashes are to be removed from fireplaces and disposed of in safe manner.
- vii) Condoms, syringes, dog excrement, contaminants or other biologically active or biologically sensitive materials are to be disposed of in a safe and sanitary manner.

---

<sup>1</sup> The total inventory and location of waste/compost/recycling receptacles may vary slightly from year to year.

- viii) All receptacles (waste, recycling and compost) must be emptied before they reach 80% of their capacity. Where appropriate, or necessary, fit all containers with the appropriate size of liner.
- ix) Immediately remove garbage (that is bagged or loose) from the Skateway, see 4.6.
- x) Provide additional personnel during Winterlude to deal with additional litter due to an increase in attendance.
- xi) Respond to unexpected or urgent site clean-ups as requested by the NCC.
- xii) Perform an extensive end-of-season litter clean-up once the skating season is officially over. If ice conditions no longer allow the safe use of vehicles, this task must be performed on foot with off-ice vehicular support. The ice surface must be clear of any litter, debris or other materials that can pollute the canal water once the ice melts.
- xiii) Use pick-up trucks with appropriate tires for any work to be done on the RCS. The contractor shall abide by all the rules and regulations relating to the operation of motorized vehicles on the RCS. The use of all-wheel drive vehicles is strongly recommended.
- xiv) Provide litter control for the following “off-ice” areas (designated as “Off ice snow removal zones” on the GIS maps – Appendix 1):
  - a. NCC support trailer(s) (Fifth Avenue)
  - b. 5th Avenue node parking lots
  - c. NAC node on Colonel by side
- xv) Paths that give access to and from Canal Skateway stairs and ramps and extend to existing maintained path, street corner, road crossing or building, such as: cement stairs and pathway from new pedestrian bridge at Somerset, cement stairs below Mackenzie Bridge, pathway to Paterson Creek building, etc.

#### 4.4 Fire Pit Management

The contractor is responsible for lighting, maintaining, and extinguishing seven (7) fire pits. The contractor must provide and deliver the firewood required for this activity. Firewood must be purchased from a local, sustainably managed forest. The fire pits are located at various on ice locations along the Skateway. Most are located in rest areas; i.e.; NAC, Concord, Fifth Avenue, Dows Lake and Bronson. The exact location of the fire pits is to be determined by the NCC each year. The fire pits must be lit and maintained as per the schedule below;

	<b>Light</b>	<b>Extinguish</b>
Friday and Saturday	10:00	22:00
Sunday	10:00	21:00
Family day (Monday)	10:00	21:00

The Contractor Shall:

- i) Maintain (light/extinguish/clean-up) the seven (7) fire pits during the Skateway season.
- ii) Before lighting the fires, the Contractor must contact the Ottawa Fire Department (OFD) dispatcher in order to inform them the fires are to be lit and to confirm their locations. This same procedure may be required when extinguishing the fires.
- iii) Provide the necessary amount of wood in order to maintain the fire pits for the entire skating season. Provide kindling and paper to start the fire.
- iv) Except for a small amount of wood equivalent to the daily consumption for that fireplace, the wood is to be stored off site.
- v) Remove ashes from fire pits as required.

#### 4.5 Sanitary Waste Management

---

The NCC washroom Chalets are directly hooked up to City sewer and fresh water lines, with the exception of the Bronson and Concord Chalets. They are equipped with holding tanks which must be Monitored and regularly emptied and/or re-filled. As previously described in the Contract, these facilities are used by hundreds of thousands of people during the RCS season. The Contractor must provide sanitary and septic waste management for the washroom facilities located at the Bronson and Concord rest areas on the RCS.

The Bronson and Concord washroom Chalets are each equipped with the following:

- One waste water holding tank (1800 liters or 400 gallons)
- One fresh water holding tank (1800 liters or 400 gallons)

Once the pre-season start-up procedures (performed by another NCC contractor) have been completed and thereafter as described below, the Contractor shall:

- i) Monitor the waste holding tanks to ensure they do not exceed 75% of their capacity at any time;
- ii) Monitor the fresh water holding tanks in order to ensure levels do not fall below 25% of their total capacity;

- iv) Duly record the total number of liters pumped out (waste) and pumped in (fresh water) on a daily basis using a register/log book supplied by the Contractor;
- v) At the end of every day, or at a time designated by the NCC, the Contractor must review the register/logbook with the NCC CMO and obtain his signature where and when required.

Due to weight restrictions and environmental risks, sanitary waste tanker trucks are not allowed on the surface of the ice. Servicing the Concord and Bronson Chalets must be performed by trucks on land, using a (minimum) 100-foot hose.

## 4.6 Disposal of Litter, Recyclables and Compostable Material

Pending on the duration of a skating season, the Skateway can produce between 6000kg to 30 000 kg of waste. After sorting, only 10% will be sent to landfill sites. The contractor will need to provide a diversion rate report of all waste.

### 4.6.1 Waste Streams

---

The Contractor shall collect, handle, accumulate and dispose of all waste, recyclables and compost in a way that mitigates the possibility of cross-contamination of the waste streams during the handling and transportation process. In order to make this possible, the Contractor shall;

- i) Supply and use bin liners and bags that are appropriately sized for the NCC collection containers (see 4.3), appropriate for each waste stream (transparent, compostable, biodegradable, etc.) and of a grade or strength necessary to allow handling and transportation by the Contractor's staff and the NCC's personnel (see 4.6.3);
- ii) Supply a minimum of three (3) waste collection bins. One (1) 40 yards bin for waste, one (1) 40 yard bin for recyclables, (1) 8 yard bin for compost. The Bins are to be kept covered at all times and be located on the contractor's premises.

### 4.6.2 Access to Waste Bins

---

The three (3) collection bins specified in 4.6.1 must be located within a location accessible by NCC staff.

### 4.6.3 Sorting before Disposal

---

Waste sorting of garbage, recycling, and compost from the Rideau Canal Skateway operations, is the responsibility of the contractor or approved third party at an agreed location between the contractor and the NCC. The waste sorting of every waste bags will be tracked on a weekly basis and will be included in a final report to the NCC, explaining the costs, photos, and percentages of total amounts in each category that have been sent to landfill, recycled or composted. The NCC is expecting that 10% of its RCS total waste, will be sent to the landfill.

(613) 239-5678 ext. 5156 or [sylvie.monette@ncc-ccn.ca](mailto:sylvie.monette@ncc-ccn.ca)

**Direct deposit payment information**

All amounts payable by NCC to the supplier will be deposited directly into the account you identified in part C. A NCC payment advice notice will also be sent to you by e-mail detailing the particularities of the payment to the address identified in part D.

You must notify the NCC of any changes to your financial institution, branch or account number. You will then have to complete a new form.

The account you identified has to hold Canadian funds at a financial institution in Canada.

**The advantages of direct deposit payment**

Direct deposit payment is a convenient, dependable, safe and timesaving way to receive your invoice payment. Direct deposit payment is completely confidential.

There are fewer risks of direct deposit payment being lost, stolen, or damaged as may happen with cheques.

Funds made by direct deposit payment will be available in your bank account on the same day that we would have mailed your cheque.

**Renseignements sur les fournisseurs aux fins de l'impôt**

En vertu de l'alinéa 221(1) (d) de la *Loi de l'impôt sur le revenu*, la CCN est tenu de déclarer, à l'aide du formulaire T-1204, Paiements contractuels de services du gouvernement, tous paiements versés aux fournisseurs pendant une année civile en vertu de marchés de services pertinents (y compris les marchés composés à la fois de biens et de services).

Le paragraphe 237 (1) de la *Loi de l'impôt sur le revenu* et l'article 235 du Règlement de l'impôt sur le revenu obligent les fournisseurs à fournir toutes les informations demandées ci-dessous à l'organisme qui prépare les formulaires de renseignements fiscaux.
