1.4 Canadian Content

The requirement is subject to a preference for Canadian goods and/or services.

PART 2 - BIDDER INSTRUCTIONS

2.1 Standard Instructions, Clauses and Conditions

All instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada.

Bidders who submit a bid agree to be bound by the instructions, clauses and conditions of the bid solicitation and accept the clauses and conditions of the resulting contract.

The 2003 (2023-06-08) Standard Instructions – Goods and Services – Competitive Requirements, are incorporated by reference into and form part of the bid solicitation, with the following modifications:

- a) Section 02, Procurement Business Number is deleted in its entirety.
- b) Section 20(2), Further Information is deleted in its entirety.
- c) Subsection 2.d. of Section 05, Submission of Bids, is deleted in its entirety and replaced with the following:

Send its bid only to the address specified in the bid solicitation.

- d) Section 06, Late Bids, Is deleted in its entirety;
- e) The text under Section 07, Delayed Bids, is deleted in its entirety and replaced with the following:

It is the Bidder's responsibility to ensure that the Contracting Authority has received the entire submission. Misrouting or other electronic delivery issues resulting in late submission of bids will not be accepted.

- f) Subsection 1 of Section 08, Transmission by Facsimile, is deleted in its entirety.

2.1.1 Equivalent Products

- 1) Products that are equivalent in form, fit, function and quality to the item(s) specified in the bid solicitation will be considered where the Bidder:
 - a) designates the brand name, model and/or part number of the substitute product;
- 2) Products offered as equivalent in form, fit, function and quality will not be considered if:
 - a) the bid fails to provide all the information requested to allow the Contracting Authority to fully evaluate the equivalency of each substitute product; or
 - b) the substitute product fails to meet or exceed the mandatory performance criteria specified in the bid solicitation for that item.
- 3) In conducting its evaluation of the bids, Canada may, but will have no obligation to, request bidders offering a substitute product to provide technical information demonstrating the equivalency (e.g. Drawing, specification, engineering reports and/or test reports), or to demonstrate that the substitute product is equivalent to the item specified in the bid solicitation, at the sole cost of bidders, within (5) calendar days of the request. If the bidder fails to provide the requested information within the specified delay, Canada may declare the bid non-responsive.

Equivalent Products and Replacement Part Number from OEM – Samples

- 1) If the Bidder offers an equivalent product or a replacement part number from the OEM, Canada reserves the right to request a sample from the Bidder in order to determine its equivalency in form, fit, function, quality and performance to the item specified in the bid solicitation.
- 2) The Bidder must, upon request from the Contracting Authority, provide a sample to the Technical Authority, transportation charges prepaid, and without charge to Canada, within (5) calendar days from the date of request. The sample submitted by the Bidder will remain the property of Canada and will not be considered as part of the deliverables in any resulting contract. If the sample does not meet the requirement of the bid solicitation or the Bidder fails to comply with the request of the Contracting Authority, the bid will be declared non-responsive.

2.2 Electronic Submission of Bids

- a) Bids must be submitted only to the Department of National Defence by the date, time and place indicated on page 1 of the bid solicitation. Bids must be received electronically as noted in subparagraph b).
- b) **Electronic Submissions: Individual e-mails exceeding five (5) megabytes, or that includes other factors such as embedded macros and/or links, may be rejected by the DND e-mail system and/or firewall(s) without notice to the Bidder or Contracting Authority.** Larger bids may be submitted through more than one e-mail. The Contracting Authority will confirm receipt of documents. It is the Bidder's responsibility to ensure that the Contracting Authority has received the entire submission. Bidders should not assume that all documents have been received unless the Contracting Authority confirms receipt of each document. In order to minimize the potential for technical issues, Bidders are requested to allow sufficient time before the closing time and date to confirm receipt. Technical and financial documents received after the closing time and date will not be accepted.

Due to the nature of the bid solicitation, bids transmitted by facsimile will not be accepted.

2.3 Enquiries - Bid Solicitation

All enquiries must be submitted in writing to the Contracting Authority no later than 5 calendar days before the bid closing date. Enquiries received after that time may not be answered.

Bidders should reference as accurately as possible the numbered item of the bid solicitation to which the enquiry relates. Care should be taken by Bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that the Bidder do so, so that the proprietary nature of the question(s) is eliminated, and the enquiry can be answered to all Bidders. Enquiries not submitted in a form that can be distributed to all Bidders may not be answered by Canada.

2.4 Applicable Laws

Any resulting contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Bidders.

3.1.3 Certifications

Bidders must submit the certifications and additional information required under Part 5.

PART 4 - EVALUATION PROCEDURES AND BASIS OF SELECTION

4.1 Evaluation Procedures

- (a) Bids will be assessed in accordance with the entire requirement of the bid solicitation including the technical and financial evaluation criteria.
- (b) An evaluation team composed of representatives of Canada will evaluate the bids.
- (c) The evaluation team will determine if there are two (2) or more bids with a valid Canadian content certification with the bids coming from two or more Bidders that are not affiliated within the meaning used in the [Competition Act](#), R.S.C., 1985, c. C-34. In that event, only those bids with a valid certification will be eligible to be awarded a contract; otherwise, all bids will be eligible. If at any point in the evaluation process it is found, whether by determination of invalidity of certifications, determination that bids are non-responsive or withdrawal of bids by Bidders, that there are no longer two (2) or more responsive bids with a valid certification, then all responsive bids will be eligible to be awarded a contract. Canada may conduct the validation of Canadian content certifications at any time in the evaluation process including doing so concurrently with other steps..

4.1.1 Technical Evaluation

PART 5 – CERTIFICATIONS AND ADDITIONAL INFORMATION

Bidders must provide the required certifications and additional information to be awarded a contract.

The certifications provided by Bidders to Canada are subject to verification by Canada at all times. Unless otherwise specified, Canada will declare a bid non-responsive, or will declare a contractor in default if any certification made by the Bidder is found to be untrue whether made knowingly or unknowingly, during the bid evaluation period or during the contract period.

The Contracting Authority will have the right to ask for additional information to verify the Bidder's certifications. TECHNICAL REQUIREMENTS FOR REPLACEMENT

1. Shall be an integrated system, with no additional components required to implement Static Decay testing of planar test samples
2. Shall incorporate a Test Assembly which will be placed in an environmental chamber and shall operate after and during environmental conditioning of between 48 and 72 hours at a temperature of 23 +/- 3C and at relative humidity (RH) of 12 +/- 3%, or 20 +/- 3%.
3. The Test Assembly shall have a maximum size of approximately 24 cm (W) x 29 cm (D) x 25 cm (H) to fit within the Environmental Chamber that QETE uses for ESD Testing.
4. The Test Assembly shall incorporate a test sample holder, capable of holding test samples of sizes 3" x 5.5" using magnetic and/or mechanical clamps.
5. The Test Assembly shall incorporate charging electrodes capable of charging the Test Sample to 5 kilovolts at positive (+) and negative (-) polarities.
6. The Test Assembly shall incorporate an Electrostatic Voltmeter Charge Sensor to measure the electric charge on the Test Sample.
7. The Test Assembly shall incorporate a Faraday Cage to prevent external electrostatic fields from interfering with the operation of the electrostatic test setup of Test Sample, Application of Electrostatic Charge, and Electrostatic Voltmeter Charge Sensor.
8. The Test Assembly shall incorporate a Safety Lockout to prevent the application of High Voltage to the Test Assembly during operator access to the test sample.
9. The Static Decay Test System shall be capable of applying a high voltage charge up to and including 5 kilovolts at positive and negative polarities to a test sample in the Test Assembly.
10. The Static Decay Test System shall be capable of setting cut-off voltages (the voltage to which the charge on the test sample decays to) at the 1% and 10% of the Accepted Charge Voltage. The ability to set a variable cut-off voltage of between 1 and 50% of the Accepted Charge is a beneficial feature.
11. The Static Decay Test System shall be capable of both Manual (Step-by-Step) and Automatic (Steps performed sequentially without operator intervention) operation.
12. In Automatic Mode, the Static Decay Test System shall record intermediate Static Decay test results for later download to a computer.

-
13. A System Test Module with a fixed Static Decay time constant shall be included with the Static Decay Test System to verify system operation and ensure the balance between + and – polarity charge testing.
 14. The Control section of the Static Decay Test System shall be located external to the Environmental Chamber for ease of operation.
 15. The Static Decay Test System shall have the capability of measuring directly:
 - a. The initial charge on the test sample;
 - b. The accepted charge¹ on the test sample;
 - c. The charge on the test sample over the decay period;
 - d. The length of time for the test sample to decay to a fixed set percentage of the initial applied charge. The fixed percentage settings must include at a minimum 10% of applied charge and 1%. Adjustable percentage settings incorporating the fixed percentage values, to 0.1% resolution is also acceptable
 16. The Control Section shall have clearly labelled controls for selection of Static Decay Test System Operation states, and clearly readable displays and indicators for the presentation of measurement results and operational status.
 - a. Decay time to 99.9 sec maximum;
 - b. Digital readout resolution of decay time to 0.1% of full scale.
 17. The Static Decay Test System shall be accompanied by a clearly written (English or French) operations manual describing the setup and operation of the unit for commonly performed Static Decay tests.
 18. Must meets the requirements for static charge dissipation and static decay rate testing including Method 4046, MIL-PRF-81705E (plus all previous generations), ANSI/ESD S541, NFPA 99 & 77, INDA, CECC, EU, SAE, ESD Association, Company Generated.
 19. Must come with Certificate of Calibration and Calibration Decal.
 20. All electrical components of the equipment must be certified or approved for use in accordance with the Canadian Electrical Code, Part 1, before delivery, by a certification organization accredited by the Standards Council of Canada.

¹ (Item 15.b.) - The accepted charge is the voltage to which the test sample charges to, resulting from the applied charge.
